

Cooper Clarke Construction Limited is committed to working in a way that acknowledges and respects the Environment. We seek to minimise our environmental impact in providing services that include building and associated trades, installation and maintenance services to both the public and private sectors. As a responsible Company we feel it is necessary to make a commitment to the preservation and improvement of our environment and to which end we endeavour to:

1. Reduce the amount of waste generated by our business activities.
2. Promote recycling and the use of recycled materials wherever possible.
3. Seek to reduce pollution, i.e. of air and water.
4. Improve energy and water conservation within our premises and encourage this elsewhere.
5. Reduce the general impact on the environment in terms of materials used and operation practices during the Company's business.

The Company is committed to introducing and maintaining an Environmental Management System (EMAS) throughout the Company to meet European environmental regulations. This means that the Company will implement policies aimed at continual improvement of our environmental performance. These policies will also encourage our suppliers to recognise and address environmental matters pertaining to their services.

This policy shall be reviewed annually and republished at least every two years.
